

New Possibilities for Online Content Delivery

Tuesday, January 31, 2012, 2:00 – 3:00 p.m.
repeated

Monday, February 6, 2012, 11:00 – 12:00 p.m.
both sessions in the

Learning Technology Lab, Wyllie D103

This session will explore several emerging technologies which provide multiple options for online content creation. Most are newly available as of last summer.

- D2L e-portfolio tool and rubrics
- Epsilen
- Respondus
- Blackboard Collaborate
- Kaltura
- Lecture Capture

It is now possible for students to create an e-portfolio and for instructors to develop rubrics in D2L or create a course in Epsilen. Live web conferencing with audio and desktop sharing is supported using Blackboard Collaborate. Respondus will facilitate creating online test banks. Kaltura assists with uploading video to a streaming server. Join us to learn about these possibilities.

This Brown Bag session is sponsored by the Teaching and Learning Center and the Learning Technology Center.
