

WHAT DO MY TEST RESULTS MEAN?

First determine if you are experiencing **COVID-19 symptoms**. These include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

You **Do Not Have Symptoms**, and Your Rapid Antigen **Test Result is Negative**:

You most likely do not have COVID-19 at this time. This test did not detect SARS-CoV-2, the virus that causes COVID-19, when your specimen was collected. However, you still may be an asymptomatic carrier or acquire the virus later. If you are a close contact of someone with COVID, you need to complete your 14-day quarantine. If you are not in quarantine, continue social distancing, wearing a mask, and washing your hands frequently.

You **Have Symptoms**, and Your Rapid Antigen **Test Result is Negative**:

You may still be infected with SARS-CoV-2. Get a confirmatory test today. **(Site specific instructions to get PCR entered here)**. Results may take up to four days. While waiting for these results, isolate at home, monitor symptoms, and stay in touch with your doctor. If you have an emergency warning sign (including trouble breathing), seek emergency medical care immediately. Isolation means that you do not go to work, school, or public areas; remain in a separate room in your home and use a separate bathroom if possible; don't share personal items; and follow all standard safety protocols.

You **Do Not Have Symptoms**, and Your Rapid Antigen **Test Result is Positive**:

Get a confirmatory test today. (**Site specific instructions to get PCR entered here**). Results may take up to four days. You **Have Symptoms**, and Your Rapid Antigen **Test Result is Positive**:

You are infected with SARS-CoV-2, the virus that causes COVID-19. You should isolate at home except to get medical care if your symptoms worsen. Stay in touch with your doctor and monitor your symptoms. If you have an emergency warning sign (including trouble breathing), seek emergency medical care immediately. Isolation means that you do not go to work, school, or public areas; remain in a separate room in your home and use a separate bathroom if possible; don't share personal items; and follow all standard safety protocols.

Your Rapid Antigen **Test Result is Indeterminate**:

There was an error with your test, and we need to repeat it. Please get back in line so that we can retest you.
