

# OUR EVOLVING FOOD SUPPLY/FUTURE FARMING

**Two Thursdays: October 31 and November 7, 2019**  
**10 AM – 12 Noon Tallent Hall, Room 182**

In this two-part class experience, we will look at the food supply. From the humble beginnings of the agricultural revolution, to farming on a massive scale, and then take a step back to look at the emerging “slow food” movement in urban areas across the United States. We will then explore new growing technologies and businesses that are at the cutting edge of our new food chain. This class will cover hydroponics, aquaponics, permaculture, as well as, look at the new businesses that have emerged in this new sector of horticulture. We will discuss the local food movement and how our global food chain needs to adapt to our growing global population and climate change.

As registrations fill, members get preference in signing up.

## Our class Presenter Ali Schultz

Ali Schultz was born and raised in rural Southeast Wisconsin. She spent most summers working in the garden on her grandparents' farm. After finishing high school, Ali attended the University of Wisconsin – Stout. In 2005 she graduated with a B.S. in Human Development & Family Studies. In 2008, she moved to Kenosha and continued her career in Social Services. She also began a part-time position at a local greenhouse that same year. In 2011, Ali started back to school part-time at Gateway Technical College. She continued to work in the commercial flower industry and also managed the Urban Farm on campus. In 2016, Ali and her husband began a Community Supported Agriculture farm, Blue Barn Farms CSA. In the spring of 2018, she began as an adjunct at Gateway Technical College and was hired on as a full time faculty member later that year.

Ali's husband teaches engineering at Lakeview Technology Academy in Kenosha. They have been married for six years and have two daughters. Their family enjoys the outdoors, gardening, music, and spending time with friends & family. They have recently moved out of the city and onto a 5-acre hobby farm and are looking forward to creating their Permaculture farm.
