How to Read the Institutional Profile Report

This DLE Institutional Profile provides valuable information on your students' perceptions and experiences of the campus climate for diversity at your institution and two comparison groups. This report provides information that can be used for student assessment activities, self-study reports, campus planning, and policy analysis. Separate profile reports are generated for full-time respondents, part-time respondents, and all respondents. Separate tabs broken out by race group, sexual orientation, and first-generation status are also included.

Comp 1 – The first comparison group is based on your institution's type, control, and if possible, selectivity.

Comp 2 – The second comparison group is based on your institution's type and control.

Factor – Items that are included in the measurement of a factor are indicated here.

Mean – The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 4=Essential, 3=Very Important, 2=Somewhat Important, 1=Not Important).

Sample University	Total			Men			Women			Genderqueer, gender non-conforming, non-binary, other identity			Factor
	Your Inst	Comp 1	Comp 2	Your Inst	Comp 1	Comp 2	Your Inst	Comp 1	Comp 2	Your Inst	Comp 1	Comp 2	
Please indicate the importance to you personally of each of the following:													Social Agency
Influencing social values													
Essential	11.1%	9.8%	9.2%	15.0%	10.7%	9.4%	15.0%	10.7%	9.4%	8.9%	9.3%	9.1%	
Very important	15.3%	13.8%	13.0%	18.3%	16.4%	13.6%	18.3%	16.4%	13.6%	13.6%	12.6%	12.6%	
Somewhat important	31.3%	28.7%	28.7%	28.2%	26.3%	26.6%	28.2%	26.3%	26.6%	33.1%	29.8%	30.0%	
Not important	42.2%	47.8%	49.1%	38.5%	46.6%	50.4%	38.5%	46.6%	50.4%	44.4%	48.3%	48.3%	
Total (n)	1,395	5,458	16,100	514	1,761	6,067	514	1,761	6,067	881	3,697	10,033	
Mean	1.95	1.86	1.82	2.10	1.91	1.82	2.10	1.91	1.82	1.87	1.83	1.83	
Standard deviation	1.01	0.99	0.98	1.08	1.03	0.99	1.08	1.03	0.99	0.96	0.98	0.97	
Significance	-	**	***	-	***	***	-	***	***	-	-	-	
Effect size	-	0.09	0.13	-	0.18	0.28	-	0.18	0.28	-	0.04	0.04	

Statistical Significance – Uses t-test to examine the difference between the mean score for your institution and the comparison group. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (*p< .05, **p< .01, and ***p< .001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is important. Large sample sizes (like those in the comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

Effect Size – Determines the practical significance of the mean difference between your institution and the comparison group. It is calculated by dividing the mean difference by the standard deviation of the comparison group. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that your institution's mean is greater than the mean of the comparison group; a negative sign indicates your mean is smaller than the mean of the comparison group. Note that a negative effect size is sometimes preferred (e.g., a negative effect size on "Since entering college, how often have you missed class due to personal/family responsibilities" suggests fewer students at your institution reported this was the case).

Standard Deviation – Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

How to Read the Module Reports

This DLE module report provides valuable information on how your students navigate higher education and experience the academic environment at your institution and with other institutions who also administered the same module. Module reports are generated for all full-time respondents.

Sample University	Total		Men		Women		Genderqueer, gender non-conforming, non-binary, other identity

Never	6.4%	9.9%	9.4%	11.6%	9.4%	11.6%	5.2%	9.1%
Total (n)	109	3,130	32	815	32	815	77	2,315
Mean	3.06	2.84	3.13	2.79	3.13	2.79	3.04	2.86
Standard deviation	1.06	1.06	1.18	1.10	1.18	1.10	1.01	1.04
Significance	-	*	-		-		-	
Effect size	-	0.21	-	0.31	-	0.31	-	0.17

All – The comparison group is based on all institutions who administered the same module.

Mean – The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 5=Very often, 4=Often, 3=Sometimes, 2=Seldom, 1=Never).

Standard Deviation – Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

Effect Size – Determines the practical significance of the mean difference between your institution and the comparison group. It is calculated by dividing the mean difference by the standard deviation of the comparison group. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that your institution's mean is greater than the mean of the comparison group; a negative sign indicates your mean is smaller than the mean of the comparison group. Note that a negative effect size is sometimes preferred (e.g., a negative effect size on "Since entering this college, how often have you missed class due to personal/family responsibilities" suggests fewer students at your institution reported this was the case).

Statistical Significance – Uses t-test to examine the difference between the mean score for your institution and the comparison group. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (*p< .05, **p< .01, and ***p< .001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is important. Large sample sizes (like those in the comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

How to Read the Theme Reports

CIRP Surveys are comprehensive, covering a wide range of topics that research has shown are impacted by the college experience. DLE Theme Reports combine relevant items together for easy access. By examining these items together, these reports illustrate what contributes to specific areas of interest on campus and to facilitate discussion on your campus. Although the survey items were included because they relate to the theme, the item(s) may not be the most important to your institution, its mission, programs, or goals. We encourage you to review your entire Institutional Profile for additional results of specific interest on your campus. Theme reports are generated for all full-time respondents.

Theme Description –
Provides a brief definition of the topics covered by the theme.

Mean – The arithmetic mean is computed for each survey item based on the response options. Response options are given numeric values and are listed in descending order (i.e., 4=Strongly agree, 3=Agree, 2=Disagree, 1=Strongly disagree).

Student Enrollment Mobility illustrates whether or not a student has engaged in or considered enrollment at another institution.

Sample University	Total			Men			Women			Genderqueer, gender non-conforming, non-binary, other identity

Note: Significance * p<.05, ** p<.01, *** p<.001

Comp 1 – Based on your institution's type (university or four-year college).

Comp 2 – Based on your institution's control (public or private).

Standard Deviation –
Measures the variability around the mean. A small standard deviation indicates that the responses to the item tend to be very close to the mean, whereas a large standard deviation indicates that the responses are spread over a larger range of response options.

Statistical Significance – Uses a t-test to examine the difference between the mean score for your institution and the comparison group. Items with mean differences that are larger than would be expected by chance are noted with one, two, or three stars, which correspond to the three standard levels of significance (*p<.05, **p<.01, and ***p<.001). Statistical significance measures the extent to which a difference is occurring by chance, not the extent to which a difference is important. Large sample sizes (like those in the comparison groups) tend to generate statistical significance even though the magnitude of the difference may be small and not practically significant. In order to provide additional context to statistical significance, effect sizes are provided.

Effect Size – Determines the practical significance of the mean difference between your institution and the comparison group. It is calculated by dividing the mean difference by the standard deviation of the comparison group. Generally, an effect size of .2 is considered small, .5 medium, and .8 large. A positive sign indicates that your institution's mean is greater than the mean of the comparison group; a negative sign indicates your mean is smaller than the mean of the comparison group. Note that a negative effect size is sometimes preferred (e.g., a negative effect size on "Since entering college, how often have you missed class due to personal/family responsibilities" suggests fewer students at your institution reported this was the case).

Active and Collaborative Learning illustrates the extent to which students are furthering their knowledge of course material through interaction with faculty, students, or staff members.													
Navigational Action illustrates how often students participate in institutional programs or how often students engage in activities that would help them successfully traverse the institution.													
Push/Pull Influences demonstrates the external factors that positively or negatively influence students' college experience.													
Satisfaction: Diversity and Community gauges perception and satisfaction with diversity and community on campus.													
Please indicate the extent to which you agree or disagree with the following statements:

Academic Enhancement Experiences gauges participation in programs and initiatives on campus that relate to student learning.													
Academic Outcomes illustrates changes to academic skills and abilities during college and how students' academic skills compare to their peers.													
COVID-19 illustrates experiences with instruction, sources of stress, views, and opinions on the institutional response to the COVID-19 pandemic.													
Interaction with Faculty relates to amount of time students spend with faculty and students' perceptions of faculty support.													
Student Enrollment Mobility illustrates whether or not a student has engaged in or considered enrollment at another institution.
