Emmanuel,

I would like to bring you up to date on the inquiry I made a few days ago about assisting the Kenosha Fire Department with their UV light sterilization system. I enlisted Vince and Katy to help and you should know that they provided tremendous and rapid assistance. After determining that the university does not own a photometer capable of measuring the wavelength of UV light used in the sterilization system, Vince and Katy did some research and found a product that will serve this need. It has been ordered and will be charged to the Provost's office. Vince has offered to provide technical advice to the Kenosha Fire Department if needed. When the Fire Department no longer needs the UV photometer, it will return to UW-Parkside and be available as a research and teaching tool. All good news for CNHS helping the community!

Gary
