Citrix Remote Access Instructions – PC
Citrix Remote Access instruction – Mac, same as PC, requires MAC OS X, v10.6.6, Snow Leopard or later.

**Getting Started**

You can get to the new Citrix site through [https://citrix.uwp.edu](https://citrix.uwp.edu) or [https://remote.uwp.edu](https://remote.uwp.edu).

The first time you access the new site, you may be prompted to install the receiver.

Click install and you will be sent to another website. Choose the Citrix Receiver.
When the install is complete, you will then be able to log in.

Single click the application you would like to use. If you click on “My Computer” it will allow you to easily view, navigate and access all the drives, folders and files that are available to you.
You may need to wait a moment while the application launches.

Now you are ready to work.
