

Infrahumanism: Can Aliens Help with Implicit Bias?

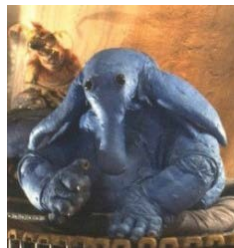

Wednesday, September 27, 2017

12:00 – 12:50 p.m.

Faculty/Staff Lounge, Wyllie 247

Presenter: Peggy James

Implicit bias is a side effect of the

human brain's programming.

As a potentially new outgroup, aliens, and other

living things, can help us discover our own, often buried constructs.

This discussion will focus on what are the types of discourse that enters into the classroom through the implicit bias lens that impacts students and how can instructors be more cognizant of implicit bias?

A vegetarian lunch of Vulcan Plomeek Soup will be served.
