

THE COLLEGE OF NATURAL AND HEALTH SCIENCES SEMINAR SERIES PRESENTS

# SCIENCE NIGHT

WEDNESDAY, OCTOBER 11, 2017 | 7-8 PM | STUDENT CENTER CINEMA

## HACKING THE HUMAN GENOME

Recent advances in technology have enabled abundant and inexpensive insight into personal genome sequences. Modern commercial enterprises are correlating human disease and disorder with genotype. This presentation will explain the accuracy and limitations of this technology while exploring ethical questions that arise when biological information becomes readily accessible in a digital world.

**DR. FRANNIE MANN**  
*Dr. Frannie Mann is an Assistant Professor of Chemistry at University of Wisconsin-Parkside. Dr. Mann is a biochemist studying the role of microbial metabolism in human health.*

Free parking after 6:30 pm - Everyone is invited - Refreshments provided

**Be. Real. Amazing.**
