

Certificate in Neuroscience Requirements

REQUIRED COURSES (13 Credits)	PREREQUISITES	OFFERED	CREDITS
BIOS 101 Bioscience	MATH 111 ENGL 100	Fall/Spring	4 credits
PSYC 325 Biological Psychology	PSYC 101 or BIOS 101	Fall	3 credits
PSYC 326 Cognitive Neuroscience	PSYC 205 PSYC 300	Spring	3 credits
BIOS 420 Neuroscience	BIOS 300 BIOS 341 (or instructor consent)	Occasionally	3 credits

ADDITIONAL REQUIREMENTS

- Before enrolling in the certificate, students must pass BIOS 101 with a B- or better.
- Minimum average GPA of 3.0 in the courses required for the certificate
- Students will be required to submit a portfolio for review and approval. The portfolio will consist of a research proposal (to be completed in PSYC 326) and a critical evaluation of a neurological condition (to be completed in BIOS 420).

ELECTIVE COURSES (select one)	PREREQUISITES	OFFERED	CREDITS
BIOS 300 Human Functional Anatomy	BIOS 101 BIOS 102	Fall/Spring	4 credits
PSYC 306 Sensation and Perception	PSYC 205 PSYC 300	Fall	3 credits

IS THIS CERTIFICATE FOR YOU?

You should consider taking this certificate if you are interested in attending graduate school for a neuroscience focused program, such as cognitive neuroscience, behavioral neuroscience, or neuropsychology. This certificate will help you gain empirical skills in psychological neuroscience, an extensive academic focus in the field of neuroscience, and critical thinking skills that graduate programs value.

The certificate is also appropriate if you are interested in working in a career that involves research experience and observation skills. Some of these careers are:

- Research psychologist
- Data scientist
- Research coordinator
